

BRILEY

A Legacy of Shooting Innovation.

STEP ONE:

PLACE STOCK AND BARREL IN THE BOX

We highly recommend that you wrap the stock and barrel of your gun separately with packing paper, bubble wrap or foam. Then carefully secure with tape.

STEP TWO:

SECURE BARREL WITH PADDING

Place padding, of your choice, on both ends of the barrel to prevent movement in transit.

STEP THREE:

CLOSE BARREL FLAP

Fold the flap over the barrel to further secure your barrel.

STEP FOUR:

WRAP STOCK IN PADDING & SECURE BOX

To prevent movement and possible damage to your stock, we recommend wrapping with additional package padding. Once done close, secure and tape your box. Your gun is ready to ship!
